

SWT 12041 – Practical for Web systems and Technologies

Faculty of Technology

South Eastern University of Sri Lanka

LAB SHEET 01

Reg. Number: SEU/IS/20/ICT/084

Academic Year :2020/2021

Date: 2023.01.25

Practical No : 01

Title: Introduction to HTML.

Aims:

- Getting an introduction to HTML basic.
- Getting practice to work with basic HTML tags.
- Getting practice to execute HTML file.

Task:

Basic Tags

- | | |
|--|----------------------|
| • HTML tag | • Link tag |
| • Head tag | • Table tag |
| • Title tag | • Order lists |
| • Body tag | |
| • Heading tag | |
| • Paragraph tag | |
| • Div tag | |
| • Image tag | |
| • Underline | |
| • Subscript and
superscript tag | |
| • Italic | |
| • Bold | |
| • Pre tag | |
| • Marquee tag | |

Activites:

1. Write the basic structure of the web document.

```
<html>
  <head>
    <title>My Frist Web Pagh</title>

  </head>
  <body>
    Welcome
  </body>

</html>
```

Output:

Welcome

2. Print the following using paragraph tag

“Video provides a powerful way to help you prove your point. When you click Online Video, you can paste in the embed code for the video you want to add. You can also type a keyword to search online for the video that best fits your document. To make your document look professionally produced, Word provides header, footer, cover page, and text box designs that complement each other.”

```
<html>
```

```
  <head>
```

```
    <titleMy Frist Web </title>
```

```
  </head>
```

```
  <body>
```

```
    <p>
```

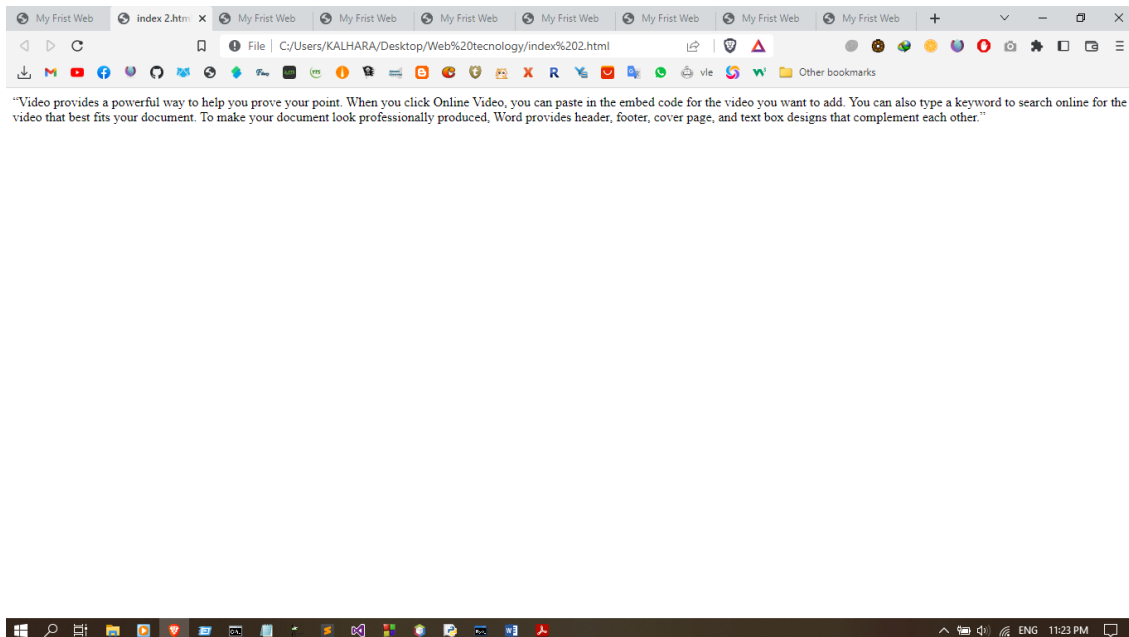

“Video provides a powerful way to help you prove your point. When you click Online Video, you can paste in the embed code for the video you want to add. You can also type a keyword to search online for the video that best fits your document. To make your document look professionally produced, Word provides header, footer, cover page, and text box designs that complement each other.”

```
    </p>
```

```
  </body>
```

```
</html>
```

Output:

03. Print the following output using heading tags

This is heading 1

This is heading 2

This is heading 3

This is heading 4

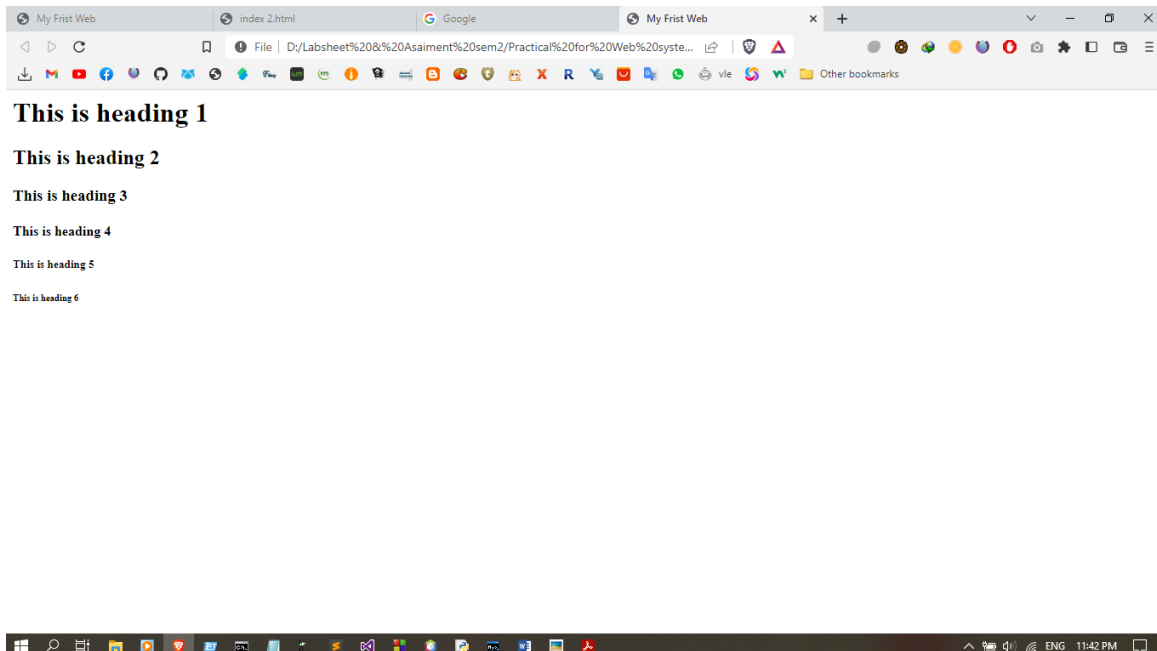

This is heading 5

This is heading 6

```
<html>
  <head>
    <title>My Frist Web </title>

  </head>
  <body>
    <h1>This is heading 1</h1>
    <h2>This is heading 2</h2>
    <h3>This is heading 3</h3>
    <h4>This is heading 4</h4>
    <h5>This is heading 5</h5>
    <h6>This is heading 6</h6>
  </body>
</html>
```

Output:

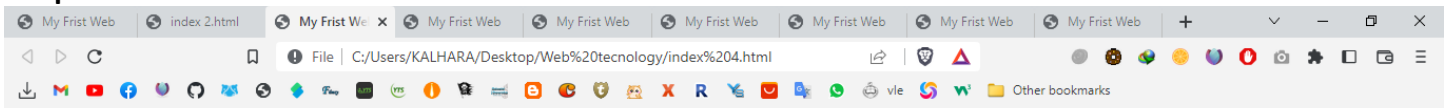

4. Write a code to link a word with the address of <http://www.google.com> and the web page should be opened in the same browser tab.

```
<html>
  <head>
    <title>My Frst Web </title>

  </head>
  <body>
    <a href="https://www.google.com/">Link</a>
  </body>

</html>
```

Output:

[Link](#)

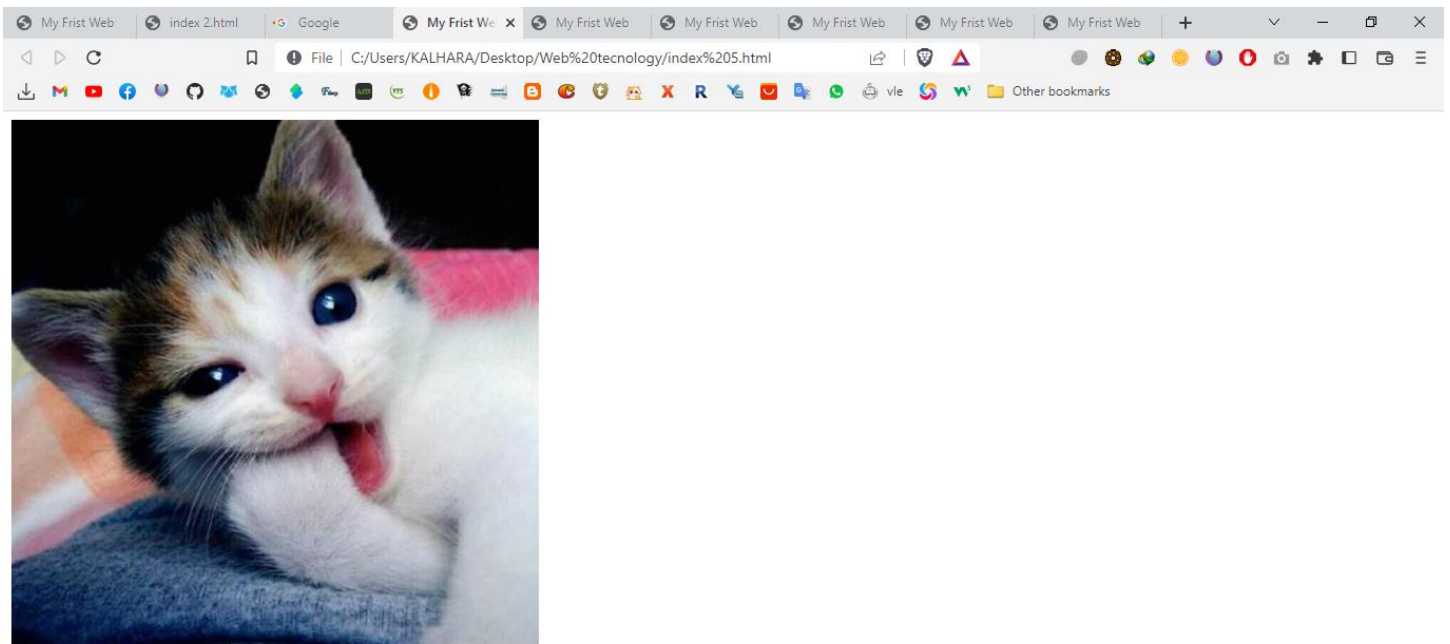

5. Write a code to insert an image using tag and set the additional attributes to the image (Ex: height, width, src, and alt).

```
<html>
  <head>
    <title>My Frist Web </title>

  </head>
  <body>
    
  </body>

</html>
```

Output:

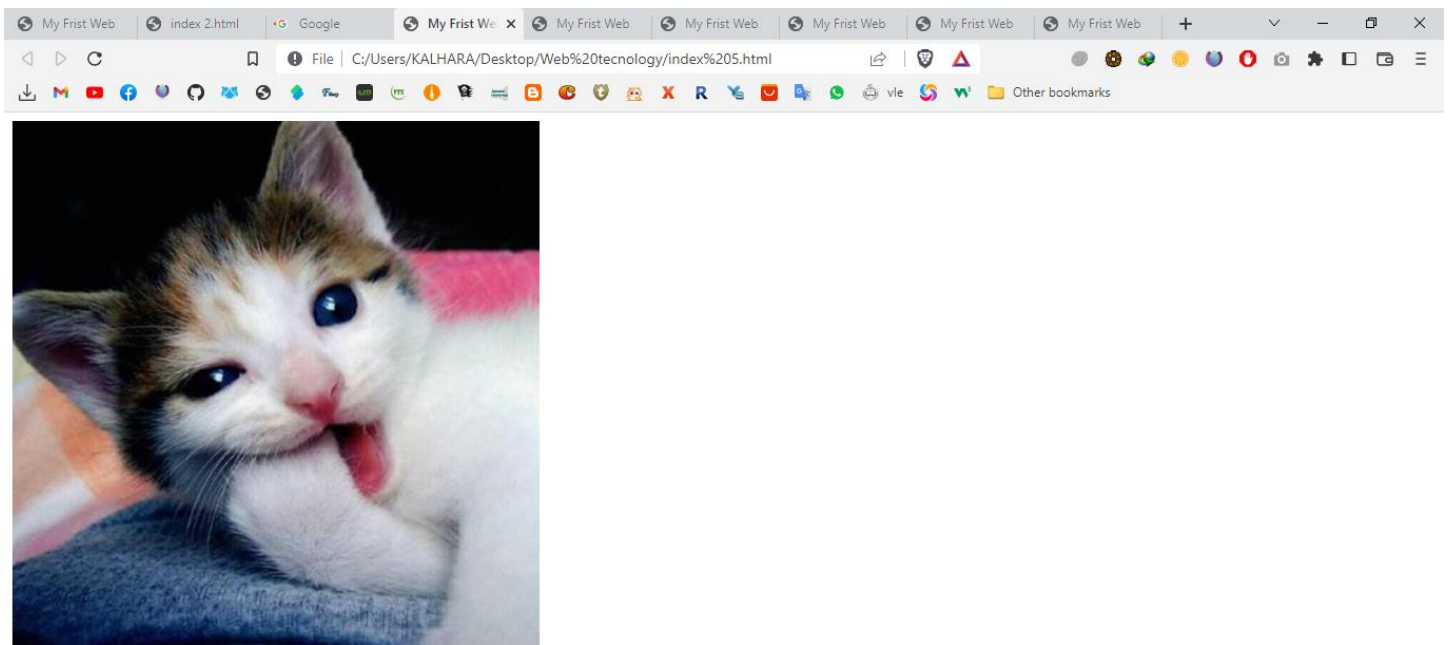

6. Modify your code of Question 5 to link that image with the address of <http://www.google.com>.

```
<html>
  <head>
    <title>My Frist Web </title>

  </head>
  <body>
    <a href="https://www.google.com/"></a>
  </body>

</html>
```

Output :

7. Get the following output using appropriate tags

a. DO a deer, a female deer
RAY a drop of golden sun
ME a name, I call myself
FAR a long long way to run
SO a needle pulling thread
LA a note to follow so
(Hint: Don't use
 or <p> tag)

b. This is H₂O and X²

c. This is Bold

d. My favorite food is cake ice cream

e. My favorite color is Green

f. *Peacock* is a bird

```
<html>
  <head>
    <title>My Frist Web </title>

  </head>
  <body>
    <div>
      DO a deer, a female deer
    </div>
    <div>
      RAY a drop of golden sun
    </div>
    ME a name, I call myself
    <div>
      FAR a long long way to run
    </div>
    SO a needle pulling thread
    <div>
      LA a note to follow so
    </div>
    <br>
    This is H<sub>2</sub>O and X<sup>2</sup>
    <br>
```

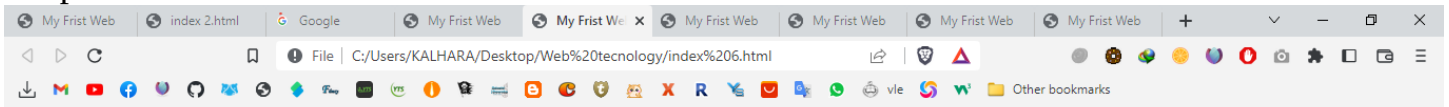

This is Bold

My favorite food is cake ice cream

My favorite color is <u>Green</u>

Peacock is a <mark>bird</mark>
</body>
</html>

Output:

DO a deer, a female deer
RAY a drop of golden sun
ME a name, I call myself
FAR a long long way to run
SO a needle pulling thread
LA a note to follow so

This is H₂O and X²

This is **Bold**

My favorite food is ~~cake~~ ice cream

My favorite color is Green

Peacock is a bird

8. Write a code to get the following output (the title of the paragraph should be displayed when you hover the mouse point over the paragraph) using paragraph tag. This is a Paragraph

```
<html>

  <head>

    <title>My Frist Web </title>

  </head>

  <body>

    <pre>This is a Paragraph</pre>

  </body>

</html>
```

Output:

This is a Paragraph

9. Write a code to get the following output of symbols.

- Registered Sign ®
- Copyright Sign ©
- Euro Sign €
- Trademark ™
- Leftwards arrow
- Upwards arrow
- Rightwards arrow
- Downwards arrow

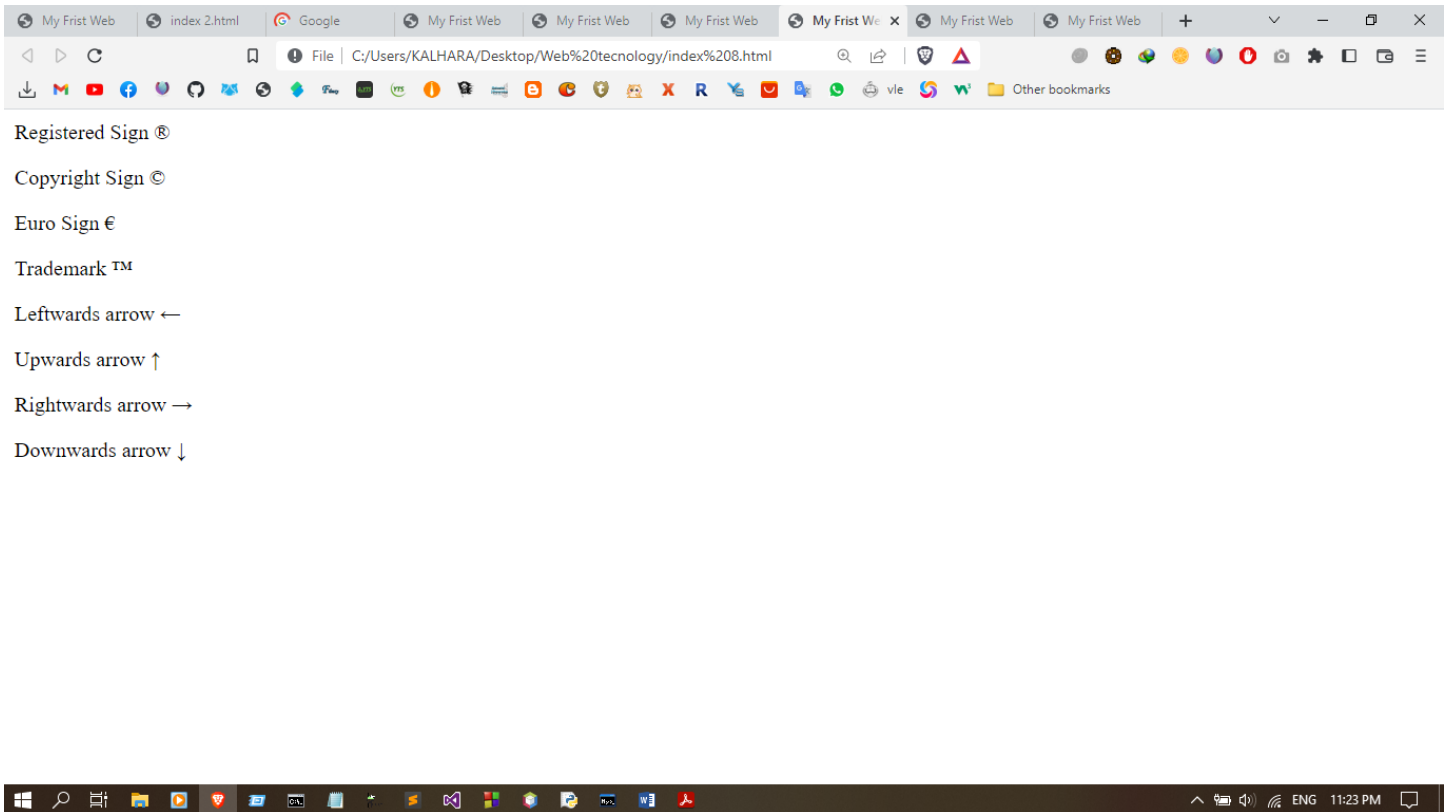

```
<html>
  <head>
    <title>My Frist Web </title>

  </head>
  <body>

    <p>Registered Sign &reg;</p>
    <p>Copyright Sign &#169;</p>
    <p>Euro Sign &euro;</p>
    <p>Trademark &#8482;</p>
    <p>Leftwards arrow &#8592;</p>
    <p>Upwards arrow &#8593;</p>
    <p>Rightwards arrow &#8594;</p>
    <p>Downwards arrow &#8595;</p>
  </body>

</html>
```

Output:

Exercise:

Create a following paragraph in html using basic html tags.

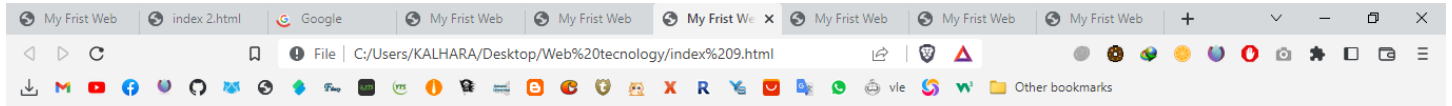

Task:

- Print the paragraph using paragraph tag.
- Underlined words should be link with a website. (any website like google.com)
- Highlighted words can be any color.
- Highlighted words should be *italic* format.
- Other bolded, superscript and subscript letters should be like the same as the paragraph.

Superscript and Subscript 7 A **subscript** (like H₂O) or **superscript** (like x²) is a character (such as a number or letter) that is set slightly below or above the normal line of type, respectively. It is usually smaller than the rest of the text. Subscripts appear at or below the *baseline*, while superscripts are above. Subscripts and superscripts are perhaps most often used in *formulas*, mathematical *expressions*, and specifications of *chemical compounds* and *isotopes*, but have many other uses as well.

```
<html>
  <head>
    <title>My First Web </title>
  </head>
  <body>
    <p>
      <b>Superscript</b> and <b>Subscript</b> &#10108; A <b>subscript</b> (like
H<sub>2</sub>O)
      or <b>superscript</b> (like x<sup>2</sup>) is a character (such<br>as a number or letter)
      that is set slightly below or above the normal line of type, respectively. It is<br>usually
      smaller than the rest of the text. Subscripts appear at or below the <mark><i>baseline</i></mark>
      , while<br>superscripts are above. Subscripts and superscripts are perhaps most often used in
      <mark><i>formulas</i></mark>,<br>mathematical <mark><i>expressions</i></mark>, and
specifications
      of <mark><i>chemical compounds</i></mark> and <mark><i>isotopes</i></mark>, but have<br>
      many other uses as well.
    </p>
  </body>
</html>
```

Output :

Superscript and Subscript • A subscript (like H₂O) or superscript (like x²) is a character (such as a number or letter) that is set slightly below or above the normal line of type, respectively. It is usually smaller than the rest of the text. Subscripts appear at or below the *baseline*, while superscripts are above. Subscripts and superscripts are perhaps most often used in *formulas*, mathematical *expressions*, and specifications of *chemical compounds* and *isotopes*, but have many other uses as well.

Discussion:
